

# Industrial

## Markets Served

- Films
- Converting
- Filtration
- Automotive

## Advantages

- Clean room acceptable
- Reduce contamination
- Moisture resistant
- Smooth surface
- Reusable
- Recyclable

## It's all about Cores

For over 50 years, Teel Plastics has been supplying film manufactures and converters with clean room quality, close tolerance plastic cores for their most demanding applications. Teel plastic cores are manufactured to exacting standards in a variety of diameters and wall thicknesses (see Teel Capabilities page), as well as engineering critical ID finishes or OD surfaces.

## Clean Room Cores

If you manufacture a specialty film in a clean room environment, Teel has a core to meet those demanding conditions. Teel's Clean Room Cores are specifically designed to address these special needs, through additional processing that include cleaning, polybaging and sealing to virtually eliminate contamination from entering your clean room.

## Work In Process (WIP) Cores

Whether you are cutting master rolls of commodity film or pressure sensitive tapes or labels, Teel WIP cores can stand up to the rigors of multiple uses. We can offer you options and cost savings to your current paper or plastic core requirements that help improve your bottom line.

## It's all about Tubing

**Filtration:** Teel Plastics is an expert in extruding plastic tubing parts and components for a variety of filtration systems. Our ability to hold very tight tolerances, as well as extrude a wide variety of materials offers water filtration manufacturers a superior product. Additionally, Teel can provide value added services such as assembly, chamfering, close tolerance burr-free cutting, and punching.

### Applications:

- Filters
- Filter Housings
- Refrigerator tubing
- Liquid supply lines
- Riser tubing
- Brine well tubing

**Automotive:** We are a manufacturer of many different types of automotive tubing. Our abilities to extrude nylon and multi-layer tubing, maintain tight tolerances and provide value added services have led us to become a valuable supplier to the automotive manufacturing market. With the capability to extrude tubing up to 6 layers, we are a perfect fit for manufacturers of automotive fuel lines.

### Applications:

- Brake lines
- Cooling lines
- Vapor lines
- Fuel lines
- Push-Pull cables
- Transfer tubing

Teel Plastics, Inc. was founded in 1951. Since then we have grown and our capabilities have expanded. We have remained true to our mission of offering precision design and production to meet the exact needs of our customers at the highest quality.
