

The Teel logo is positioned in the top right corner of the page. It features the word "Teel" in a bold, italicized, teal-colored sans-serif font. The background of the entire page is a dark, almost black, color with a teal wavy graphic element at the top. The central focus is a dense array of diagnostic swab sticks in various colors (teal, grey, blue, and white) arranged vertically, creating a strong sense of depth and repetition.

Teel

A World Leader in Diagnostic Swab Sticks

SWAB STICKS

Swab Sticks

Teel is a leader in injection molded and extruded medical swabs sticks. In addition to diagnostic testing (including COVID-19 testing), our swabs are used for forensic analysis, scientific analysis, and safety testing in the food processing market. We can help you design a swab specific to your needs, and our ISO 9001 and 13485 certifications demonstrate our commitment to quality. All of our swabs are USA made at our headquarters in Baraboo, Wisconsin.

Teel production capabilities include automatic packaging and end-of-arm tooling, meaning faster production times and easier part sorting. Typical swab dimension tolerances are 0.010 for length, 0.003 for OD, and 0.002 for roundness (0.006 for PP and PE).

Material Options

- Polystyrene
- Polypropylene
- Polyethylene
- Nylon
- Proprietary Teel polystyrene blend
- Coextrusion with two different materials

Injection Molded Swab Options

- Scored
- Thin tip for flocking
- Bulb tip for foam

Extruded Swab Options

- Serrated
- Hollow
- Solid
- Breakable
- Non-breakable
- Scored
