Twelve-Way Multiduct

Teel’s multiduct combines multiple fiber or communications microducts into a joined pathway. The flexible ducts provide for clean, continuous, low-friction cable delivery.

Standard Features
- Teel Plastics Jet Glide additive helps reduce friction, making installation easier
- Inside ribbing for increased fiber cable blowing distance
- Microducts available in blue, orange, green, brown, gray, white, red, black, yellow, violet, pink, and aqua

Optional Features
- 20G insulated copper tracer wire
- One or two rip cords
- Custom print line
- Custom oversheath color
