

Teel Plastics manufactures a variety of tight tolerance custom parts for industrial markets.

Tight Tolerance Cores: Teel extrudes cores to meet demanding cleanroom conditions. Our cores are specially processed including cleaning, polybagging, and sealing to virtually eliminate contamination from entering your cleanroom environment.

Reusable & Work In Process (WIP) Cores: Teel makes cores that stand up to the rigors of multiple uses. We offer you options and possible cost savings compared to current paper and plastic core requirements that will improve your bottom line.

Filtration: Teel expertly extrudes plastic tubing and components for a variety of filtration systems. Our ability to hold very tight tolerances, as well as extrude a wide variety of materials offers water filtration manufacturers a superior product. We also provide value added services such as assembly, chamfering, close tolerance burr-free cutting and punching.

Automotive: Teel manufactures a variety of parts for the automotive market including fuel lines, brake lines, cooling lines, push-pull cables, vapor lines and transfer tubing. We extrude engineered resins including nylon and fluoropolymers in tight tolerance, multilayer tubing. We also do custom finishing and assembly.

Pipe: Teel extrudes industrial pipe made of HDPE, PP, PVC, ABS, HIPS and Kynar. Our pipe is made to ASTM and NSF

specifications. Markets include geothermal, chemical, mining, water, electric and telecom utilities.

Custom Tubing, Cores & Profiles: Teel designs and develops thermoplastic extruded tubing and cores with engineered excellence. We work with your team to develop a custom solution. Bring us your next project and experience the Teel difference.

Secondary Operations:

- Coating
- Inline printing
- Offline printing
- Burr-free cutting
- Chamfering
- Punching
- Packaging
- Close tolerance cutting
- Hand assembly
- Notching
- Tipping
- Painting
- Boring
- Sealing
- Angle cuts
- Slotting
- Flaring
- Custom automated assembly

Single or double line printing on core interior

In 1951, Teel Plastics began producing custom plastic tubing and profiles. Since then we have become experts in a variety of applications targeting the medical, cleanroom, converting, water filtration, plastic packaging, and precision industrial markets.

Smart. Dedicated. Resourceful. Above all – Precise!

The Teel difference is the extreme level of precision employees bring to their work. For six decades we have specialized in the custom extrusion of thermoplastic close tolerance plastic tubing and profile products.

We are proud of the innovative products we've brought to the markets we serve, like co-extruded tubing. We've combined our employee skills along with unique manufacturing techniques to earn a reputation as a proven leader of high quality, made-to-order plastic tubing, cores, profiles and natural fiber composite products.

Customer Satisfaction

To achieve customer satisfaction we do something very simple. We listen. We strive to know each customer and are committed to identifying their needs, defining our capabilities and ensuring that we can satisfy those needs. We realize that continuous improvement is essential for our success. We work to anticipate trends and customer demands.

At Teel, we value our ISO 9001 certification and we facilitate total quality throughout our entire business to ensure customer satisfaction.

Teel's Headquarters Accommodates Its Expanding Extrusion Division

We are proud to say that the objectives of this project were shared by every member of the Teel Plastics team. We worked together to realize the design and building of an environmentally conscious 150,000 square foot facility focused on lean manufacturing. Lean manufacturing reduces waste, costs and production time while increasing customer satisfaction and quality.

Engineering Excellence

We pride ourselves on having an engineering team that is one of the most experienced and innovative in the industry. We have on staff more than 200 years of engineering experience and degrees including: Industrial Technology, Tool Design, Chemical Engineering, Applied Sciences, Mechanical Engineering, Business Management, Mechanical Design and Manufacturing Engineering.

Quality

Teel's Quality System has been certified to ISO 9001 standards since 1997. This system is an integral part of the business organization providing the foundation for growth and achievement of the company's vision. The system provides a method to have predictable results in production, new hire training and sustain documentation of best practices. Process control is also achieved with computerized SPC (Statistical Process Control) on all production lines. We strive to meet custom requirements for specific customers.

Analytical Lab

Teel Plastics is continually focused on improving the services we offer our customers. We offer expanded analytical lab capabilities with a variety of instrumentation and test methods.

Dedicated and confidential lab services are available to you.

Our goal is to produce and deliver the highest quality product in the most cost efficient manner possible. Period. That is what makes Teel measurably better.
