

## About Teel

Teel is an ISO 9001- and 13485-certified manufacturer of extruded and injection molded products. With a team of dedicated engineers, Teel partners with customers from development to production. Our manufacturing lines use SPC tools to ensure consistent quality and to adhere to our customers' specifications. In addition, our onsite ISO/IEC 17025:2017-accredited analytical lab is used to test and troubleshoot.

## Teel Cosmetics

- Teel injection molds cosmetic products for some top names in the cosmetics industry. Our manufacturing experience, engineering team, color room, analytical lab, and assembly capabilities allow us to provide our customers with an array of options and technical support.
- Teel can ensure your packaging meets all regulatory requirements. Our analytical laboratory can even perform analysis on formulations to ensure weight loss requirements are met.

## COSMETIC PACKAGING

### Capabilities

- A **full-service solution** including machining, decorating, regulatory support, analytical testing, and assembly.
- For injection molded caps and barrels, our engineering experience and mold flow technology help us achieve **tight stack-up tolerances**.
- Teel's **in-house color room** offers an array of color options and is able to do **small batch runs** of parts down to 5,000 units.
- **Glossy and textured** finishes.
- **Four- to six-week** lead times for many products.

### Product Specifications

#### Extruded Sharpenable Barrels:

- AES
- PS
- COC
- CAB
- PP
- Natural Fiber Blends
- Foamed Blends

#### Product Sizes Include:

- OD from 7.7-11.7 mm
- Lengths from 80-190 mm

#### Injection Molded Components

- Protector caps
- Barrels
- End caps
- Sharpeners
- Screws
- And more...

#### Injection Molding Materials:

- POM
- PP
- COC
- PETG
- PMMA
- ABS
- Many more...
